

Altitude® A8 Screens Now Available in Contourett

A Durable & Easy-to-Clean Polyurethane

Altitude A8 screens create a natural privacy barrier above and below the worksurface. The A8 screen extends 21¾" above and 10" below the worksurface, creating a boundary around your personal workspace in a clean and attractive way. As workspace design evolves, creating a sense of physical privacy and personal space can help promote individual well-being. Adding a privacy screen, like an A8 screen, to compatible work surfaces offers the much-needed personal perimeter we now look for in our workspace.

A8 screen kits (U, Rectangle) are now available in Contourett, a non-tackable 100% polyurethane, a durable and easy-to-clean surface that allows for the use of a variety of cleaning agents.

Specifying for Freestanding Worksurfaces

Altitude A8 screens are designed to fit on Altitude worksurfaces, which are undersized by 2" to allow for height-adjustable motion. This is a common design for height-adjustable worksurfaces, but there are a few steps to take to verify non-Altitude worksurfaces are compatible.

1. Understand measurements of worksurface
2. Match with correct A8 screen size
3. Consider clearance of modesty screen and mounting brackets

Example: 48" Altitude Worksurface (AF5RS4824) is actually 46". A 48" U-Screen kit would be the correct screen size to specify with this worksurface.

Allsteel Customer Support is available to verify when needed.

How to Clean

Contourett

- For wet spills, gently blot with dry cloth to remove spill.
- For dried spills, gently work the spill in a non-aggressive circular motion using a damp cloth, making sure to not oversaturate the fabric.
- For dried stains, use a mixture of Tide or Oxiclean and warm water (1 teaspoon of soap for every 16 ounces of water). Follow instructions for dried spills above. Make sure to wipe away any excess soap left behind and remove any moisture with a dry cloth.
- For non-liquid spills, always remove excess contaminant from surface before cleaning. The use of a soft brush or soft abrasive can be used to remove dried contaminants before performing liquid cleaning.
- For healthcare related stains, a water-to-bleach solution of 5:1 is recommended. Rinse cleaned area with water.
- For stains requiring the use of a solvent, spray the solvent directly onto the stain and allow it to sit for 2-3 minutes, avoiding over saturating the fabric. Follow directions for dried stains above.
- Always allow fabric to air dry.

Approved Cleaners for Contourett

It is important to remember that after use of any cleaning agent, the fabric should be rinsed with water and wiped dry to remove any remaining residue or moisture. Approved cleaning agents include Shockwave, Recon, Benefect, Microban, Greased Lightning Degreaser, Lysol Wipes, Diluted bleach solution (5:1 water to bleach), Dispatch Disinfectant Towels with bleach, PDI Sani-Hands Wipes, PDI Super Sani-Cloth Germicidal Disposable Wipes, Diversity Morning Mist Neutral Disinfectant Cleaner, Virex 256, Fantastik, Oxycide, Formula 409.
